MERN Stack Developer

Results-driven MERN Stack Developer with 6 months of internship experience building scalable web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in REST API development, responsive UI design, and Git-based collaboration workflows. Seeking a full-time Software Developer role to contribute clean, efficient code in a product-driven environment.

SKILLS

- **Backend** : Node.js, Express.js, REST APIs, Authentication & Authorization, Middleware Development
- **Database** : MongoDB, Mongoose, Schema Design, Aggregation Pipelines
- **Performance & Security** : Query Optimization, Rate Limiting, Input Validation, CORS Configuration, Token and cookies
- **Methodologies & Workflows**: Agile/Scrum, Git-based collaborative workflows (branching, PR reviews), CI/CD awareness.
- **Architecture** : Multi-tenant SaaS, MVC, RESTful Design
- **Languages** : JavaScript (ES6+), Typescript
- **Tools** : Git, Postman, Nginx
- **Frontend** : React.js

WORK EXPERIENCE

Inovitrix Pvt. Ltd. 

01/2026 – 06/2026

Student Admission & Academic Management System (MERN Stack | Microservices)

Sangli, Maharashtra

- Architected a **full-stack web platform** for student admissions and academic record management using **MERN stack with a microservices architecture**, separating concerns across Auth, Student, and Academic services
- Designed and implemented **MongoDB schemas** with Mongoose for structured storage of student profiles, admission records, and academic data with relational references across collections
- Built a secure **authentication system** using **JWT (JSON Web Tokens)** with private key signing, **bcrypt password hashing**, and **HTTP-only cookie generation** for session management
- Developed **RESTful APIs** with Express.js for admission inquiry handling, student onboarding, and academic detail CRUD operations across independent microservices which helped minimized system downtime or isolated errors.
- Implemented a **custom middleware layer** for user input validation, request sanitization, and role-based route protection (Admin / Student access levels)
- Enabled real-time **admission contact flow** where prospective students submit inquiries that are routed, validated, and stored via the backend pipeline.
- **Code Reviews** : Participated in team brainstorming sessions and peer code reviews, focusing on refactoring legacy logic into clean, maintainable ES6+ JavaScript.

Smart Kid Abacus - India's Best Abacus Franchise Company | 90% Success Rate 

ERP System Development (Feedback Module) Internship, JSPM JSCOE

09/2025 – 12/2025
Jayawantrao Sawant
College of Engineering,
Hadapsar, Pune

- Contributed to the development of a college-wide **ERP system for students, faculty, and alumni**.
- Designed and implemented the **Feedback Module** to collect structured, unbiased academic feedback.
- Built the frontend using React with proper form validation and input sanitization.
- Developed **RESTful APIs** using **Node.Js** to handle feedback submission and retrieval.
- Used **MongoDB** to store and manage feedback data mapped to department, academic year, and semester.
- Ensured feedback was accurately linked to each student's curriculum (e.g., branch, year, semester) to maintain data integrity and prevent bias or misclassification.
- Streamlined data flow between frontend and backend for reliable and secure feedback processing.

PROJECTS

Expense Tracker & Personal Finance Management System,

Tech Stack : (Node.js | Express.js | MongoDB | JWT | Nodemailer | Bcrypt)

- Architected a **full-stack financial tracking platform** enabling users to monitor real-time bank balances, categorize income/expense transactions, and set & track personal savings goals with progress indicators
- Engineered a **secure, modular backend** following a Microservices-style **Model-Service-Controller (MSC) architecture** using Node.js and Express.js, ensuring clean separation of concerns, high maintainability, and production-level scalability
- Designed **MongoDB schemas** with Mongoose for structured financial data modeling and leveraged **aggregation pipelines** for complex budget analytics, spending summaries, and category-wise expense breakdowns
- Implemented a **robust authentication system** with JWT-based token auth, **Bcrypt password hashing**, and protected route middleware to secure all user-specific financial data
- Integrated **Nodemailer** to trigger automated email alerts for budget threshold breaches, savings milestones, and transaction confirmations — simulating real-world fintech notification systems
- Built **custom middleware** for request validation, error handling, and auth token verification across all API endpoints

Online Education Platform, Tech Stack: HTML, CSS, JavaScript, PHP, MYSQL

- Developed a membership-based platform for enrolling in multiple courses.
- Designed a user-friendly, responsive interface for improved engagement.
- Integrated MySQL database for storing user data, instructor data, course details and memberships.

EDUCATION

Master's In Computer Application (MCA),

JSPM's Jayawantrao Sawant College Of Engineering(pursuing)
GPA: 7.8

09/2025 – Present
Pune

Bachelor's In Computer Application (BCA),

Ganpatrao Arwade College of Commerce
GPA: 7.22

10/2021 – 03/2024
Sangli
